

APPEAL

The information provided in this brochure is intended to build steady and growing stream of philanthropic fund to meet operating expenses incurred towards treating the heart related ailments in poor adults and children.

Our mission is to improve the condition of people in rural and urban India dying prematurely from heart disease; and enable people with heart disease to live a healthy life

SWAMI VIVEKANAND MEDICAL MISSION HOSPITAL, NAGPUR

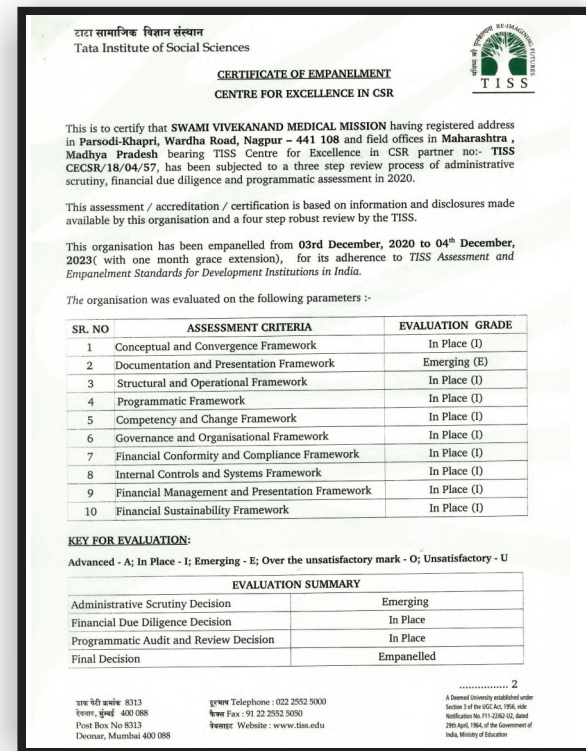

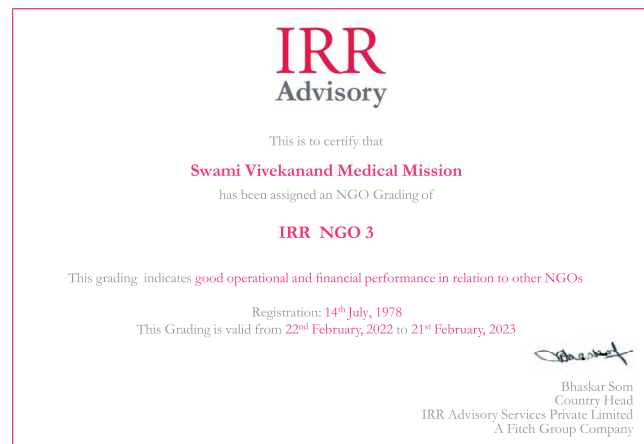

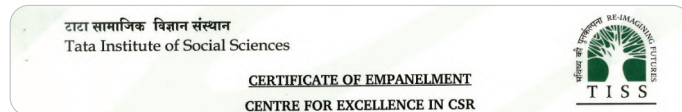

| DONATE | SHARE | FUND RAISE

SWAMI VIVEKANAND MEDICAL MISSION HOSPITAL

- Swami Vivekanand Medical Mission (SVMM) was established as Charitable Organization in 1974 in a cow-shed as OPD by a group of Voluntary Doctors.
- Today it has blossomed into a full-fledged hospital offering affordable health services to patients in Central India.
- SVMM is equipped with advanced medical facilities to treat a wide range of health problems.
- Offers unfaltering affordable medical services to the poor families.
- Besides treating the poor, the hospital has also developed a special wing to cater to middle & upper middle class population.
- SVMM also runs nursing school, sub centre, Mobile health van & works in preventive health.

- Over 350 cataract surgeries
- Around 150 pediatric surgeries for birth defects
- 100 SQUINT surgeries in School going children
- 2500 Dialysis procedures
- SVMM is implementing partner in

Govt. Jeevandayee Scheme since 2014 with

500+ MJPJAY & Charity Scheme admissions per Year

HEART CENTER

Advanced Treatment for Heart related ailments

In times when the rising healthcare costs often become unaffordable for the poor, SVMM is looking for avenues to raise money and garner other types of support to facilitate better heart related non-critical and critical treatments (pediatric and adult) for deserving rural & urban population from Nagpur district and central India.

Situation in Target Population

Prevalence of Pediatric heart diseases is about 19.14 per 1000 individuals. Majority (58%) of patients are diagnosed between 0-5 years of age. Many children are born with minor or major heart defects are in need of immediate medical attention. However, there is lack of awareness, resources, (sometimes lack of access to medical facility) to deal with symptoms, cure, & take steps for prevention.

Owing to the changing lifestyle & environmental factors, instances of heart related diseases are rising both in urban & rural adult population leading to significant loss of man hours & life. Patients in the lower & middle income groups cannot afford treatments like ANGIOPLASTY, BYPASS SURGERY.

ADOPTING MULTI-PRONGED APPROACH

- SVMM has launched project to spread awareness about risk factors via presentations, exhibitions and other suitable means.
- SVMM is Holding FREE Diagnostic Camps for rural and urban populace (with fewer means & resources) to facilitate early screening & detection of prevalent risk factors and prescribing treatments.
- SVMM is arranging further evaluation of disease, advanced care and treatment for individuals identified with symptoms facilitating appropriate treatment of the condition.

EXPECTED BENEFICIARIES AND IMPACTS / EFFECTS

	Direct Beneficiaries (target group)	Indirect Beneficiaries
Details including the number	Around 1000 patients treated & 10,000 OPD patients every year in Cardiology Department	Approx. 2 L population in the 150 villages in the vicinity of the health center
Expected Impacts/ Effects	Less waiting time for treatment will reduce morbidity & mortality of the patients	Prevention of economic crisis in the target group families. Reduction in loss of man hours of the patients and relatives

HEART CENTER FACILITIES

The Heart Center is aimed to specialise in the diagnosis, treatment, monitoring & managing cardiology conditions, where we can offer a complete treatment from diagnostic testing to research-based treatment plan for every patient based on his/her health & financial condition. To achieve the same, we have

- Cath-lab for Angiography & Angioplasty (proposed).
- Modular Cardiac Operation Theatre (Adult & Pediatric).
- Adult Recovery Unit .
- Pediatric Recovery Unit.
- ICU.
- End-to-end OPD Services.
- Diagnostic services (ECHO/TMT/Dietician/Diabetologist/Blood investigations)
- Physiotherapy, Preventive Cardiology, Diet & Diabetic Care unit, Yoga & Meditation.
- Pathology & other Radiology Services backup facility.
- Heart Health Related Awareness Campaigns.
- Planned investigation for diagnosed BP & Diabetes patients.

Ask nothing ; want nothing in return. Give what you have to give;
It will come back to You; But do not think of that now.
